

Human Resources Department requests

A. The human resources (HR) department needs some employee performance reports. **First**, they want to see the dollar figure of orders taken by each employee title group in 2021 [Employee Group 2021 Orders]. They would like to see this by employee title group and by individual employee [Employee Order Total 2021].

RESULTS / Summarize #28 / Output | 4 Rows | + New Sample

Row ID	Employee Title	Sum Total Orders
1	Sales Representative	690454
2	Vice President, Sales	155825
3	Inside Sales Coordinator	86691
4	Sales Manager	117977

RESULTS / Summarize #49 / Output | 9 Rows | + New Sample

Row ID	Employee Name	Employee Title	Sum Total Orders
1	Laura Callahan	Inside Sales Coordinator	86691
2	Robert King	Sales Representative	121075
3	Margaret Peacock	Sales Representative	108854
4	Anne Dodsworth	Sales Representative	100108
5	Nancy Davolio	Sales Representative	119250
6	Michael Suyama	Sales Representative	112453
7	Janet Leverling	Sales Representative	128714
8	Andrew Fuller	Vice President, Sales	155825
9	Steven Buchanan	Sales Manager	117977

How many employee categories are presented on the list that was generated by your workflow?

There are 4 employee categories presented in workflow list (Sales Representative, Vice President Sales, Inside Sales Coordinator, and Sales Manager).

Which employee category has the lowest total orders in the given time period?

Inside Sales Coordinator was the lowest in total orders in the given time period at \$86,691.

B. BA 342 Company would like to reward employees for their service based on the length of time they have been with the company. These bonuses will be paid out on 12/31/2024, so please calculate the bonuses based on that date. Please provide each employee's first and last name with their hire date and a field showing how many years the employee has worked here. Lastly, create a bonus column that gives a \$10,000 bonus to any employee who has been with

the company at least 30 years, a \$3,000 for more than 25 years, and a \$1,000 bonus for more than 10 years. All other employees will not receive a bonus at this time. [Employee Bonus]

11	Linden Maddox	6/18/01	23	1000
12	Malik Landry	7/21/04	20	1000

What is the total bonus paid by the company?
The total bonus paid by the company is \$57,000.

Marketing Department requests

A. Marketing is planning a campaign to target top customers (measured in terms of 2021 and 2022 NET sales equal to or greater than \$18,000). They want to know the combined 2021 and 2022 net sales total (sales reduced by discounts) for each customer with net sales equal to or greater than \$18,000. Create a workflow that displays the customer id, customer name (last name, first name in a single field), net sales and the count (number) of sales for each of the top customers (over the sales threshold). The results should display Net Sales from largest to smallest. Make sure that you count the number of sales and not the number of sales invoice line items. Rename fields as appropriate. [Top Customers]

Did the customer with the highest total net sales have the highest quantity of sales?
No, the customer with the highest total net sales did not have the highest quantity of sales. The highest quantity of sales was the customer with the second highest net sales.

Which customer(s) achieved \$18,000 in sales with the fewest orders?
Mario Pontes achieved over 18,000 dollars in sales, with the fewest products bought overall, being 677 products in total.

B. The marketing department is running analytics on BA342 Company's customer base and wants to determine which customers purchased its highest grossing products and whether there were any discounts associated with those products. The department would like to know the total sales discount, in dollars, BA342 Company offered for products with sales prices per item exceeding \$500. Show the following fields in your output: Customer Name (first and last as one field), Product Name, Product Sales Price, and Product Discount (in decimal format). Sort descending according to sales price. [Highest Grossing Products]

How many records are reported based on your results?

Based on the results there are only 4 records reported.

If England and the UK are the same country, how many records are actually represented as having shipping and billing addresses in different countries?

If England and the UK are the same country, they would still have 4 records reported. This is proven to be true as in my formula tab I put and IF statement for the UK and England.

Sales Department requests

A. The sales department receives calls from customers on a regular basis asking what types of products BA342 sells. A customer has called and wants to know what Chocolate and Coffee products the company sells. Design a workflow showing all products sold by BA342 that include “Chocolate” or “Coffee” in the title. In your summary, please provide the Product name, Supplier name, Unit Price. [Chocolate_Coffee Products]
